

How to use

REVE ANTIVIRUS MOBILE SECURITY

REVE Antivirus mobile security is a complete guard that keeps your Android mobile protected from all types of online threats.

DOWNLOAD

Download REVE
Mobile Security
from Google
Play Store.

REGISTER

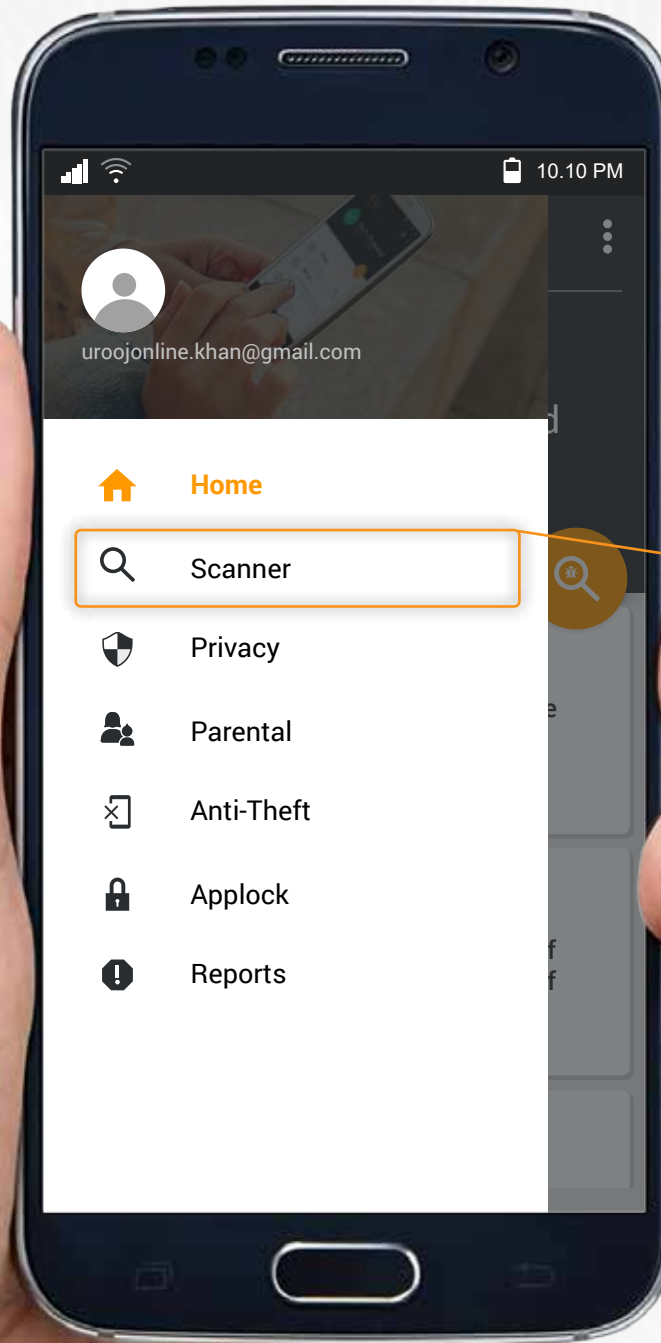

Sign up
using your
name, email and
password.

LOGIN

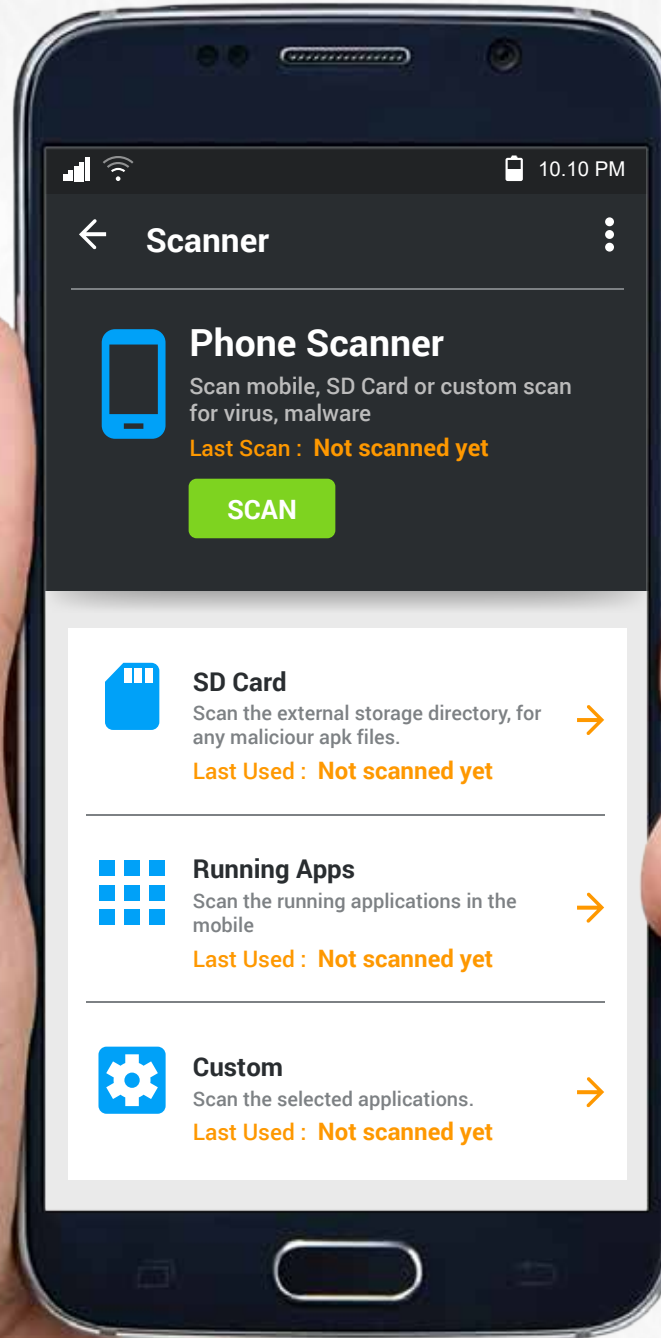

Enter your registered email & password and tap the login button.

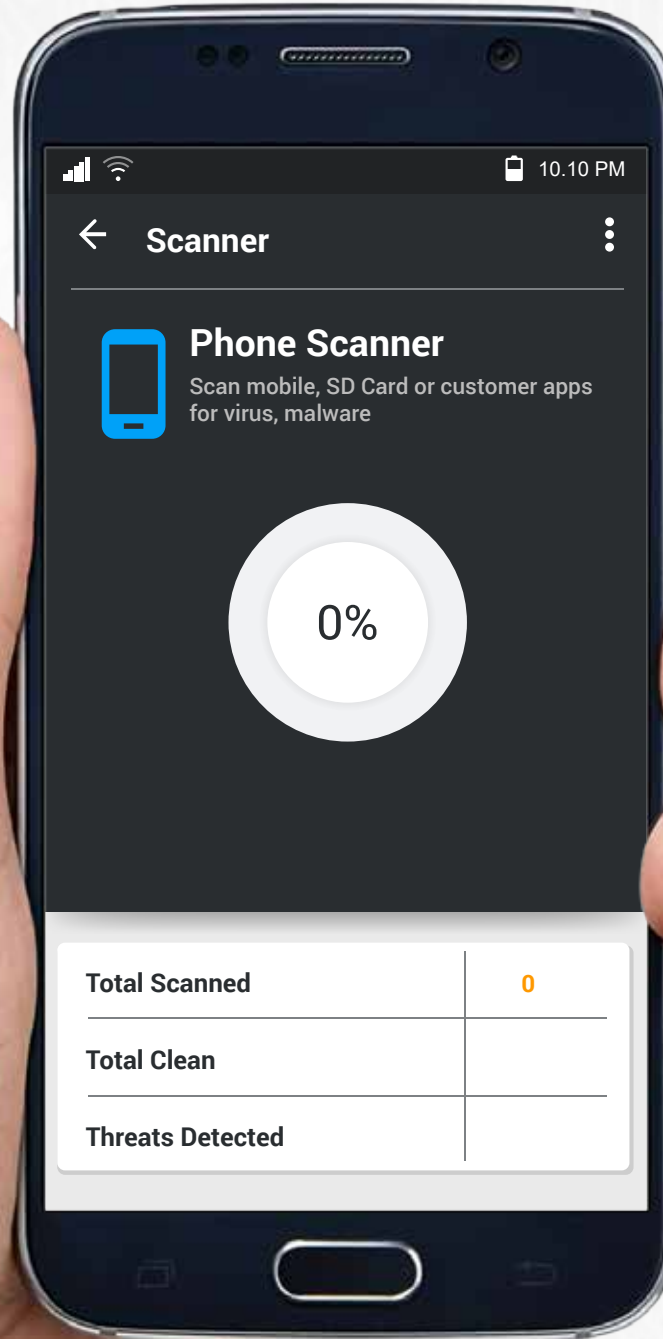

Logging in
you can access
the dashboard.

Let's start by
tapping the
scanner icon.

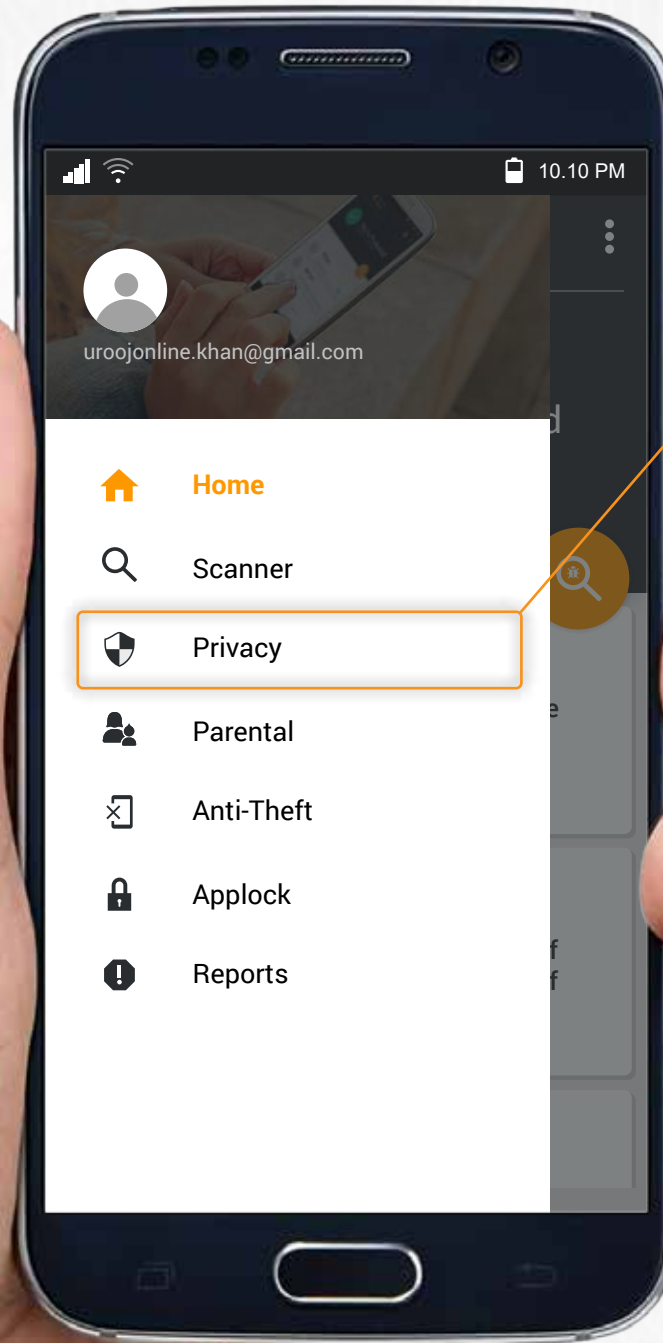

Phone Scanner allows you to scan mobile, SD card and apps for virus.

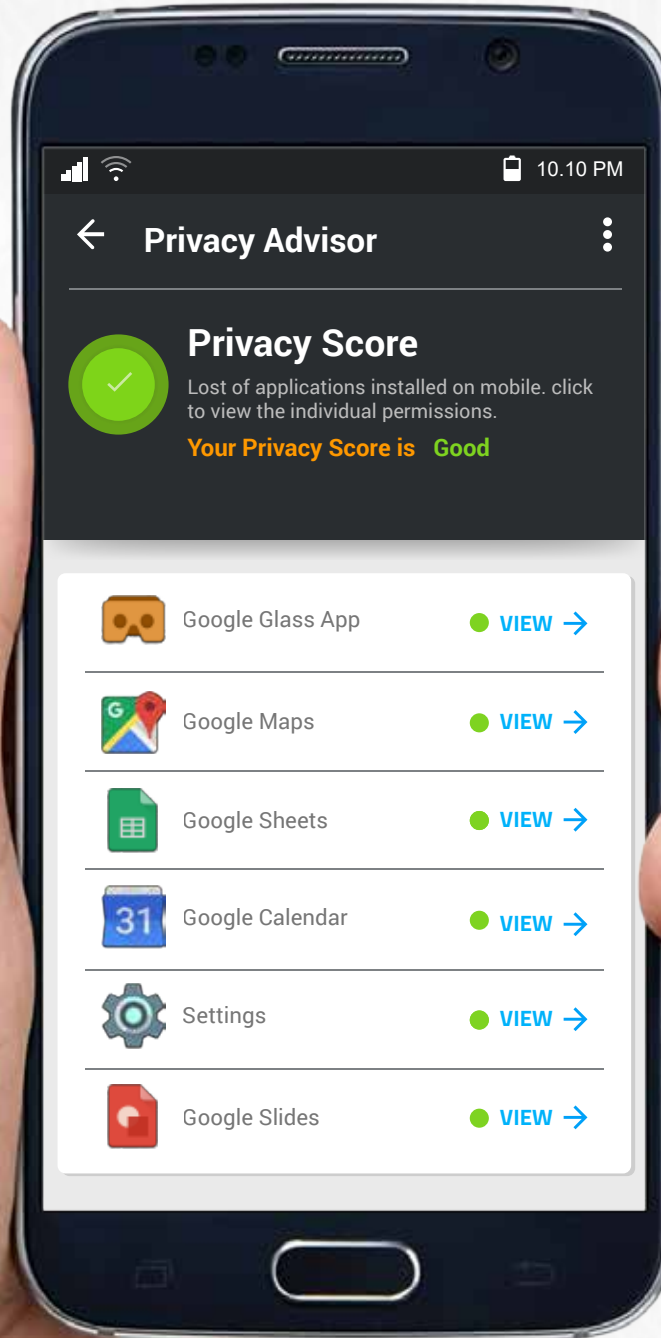

You can also scan any particular application tapping on 'Custom' button.

The Phone Scanner scans to detect malware if any.

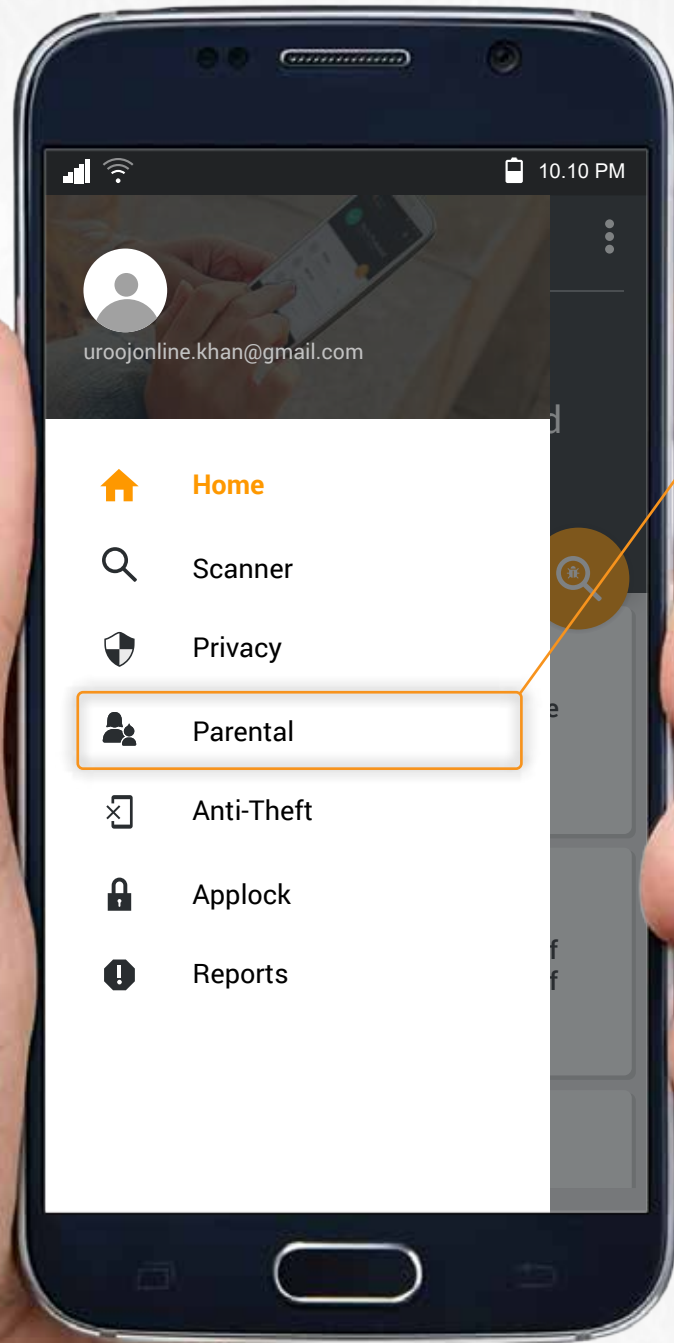

Privacy advisor lets you know what data your apps are accessing in the background.

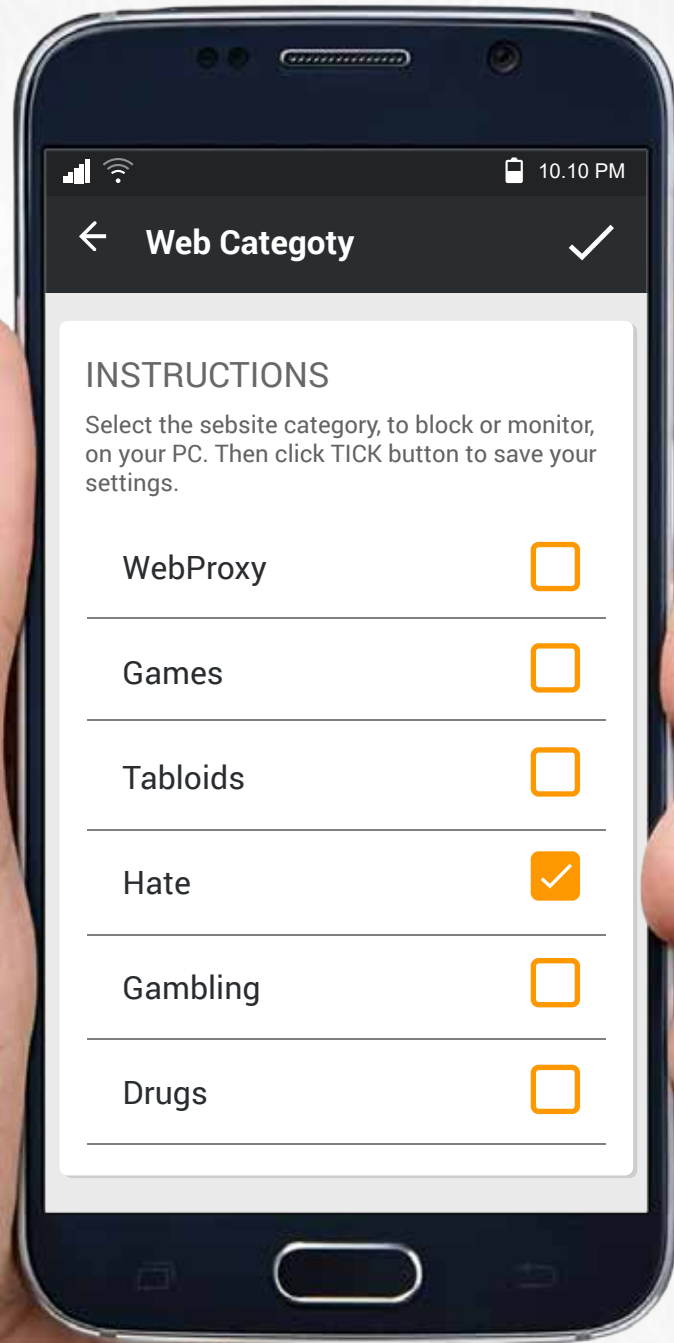

It displays complete list of installed apps along with their permission level.

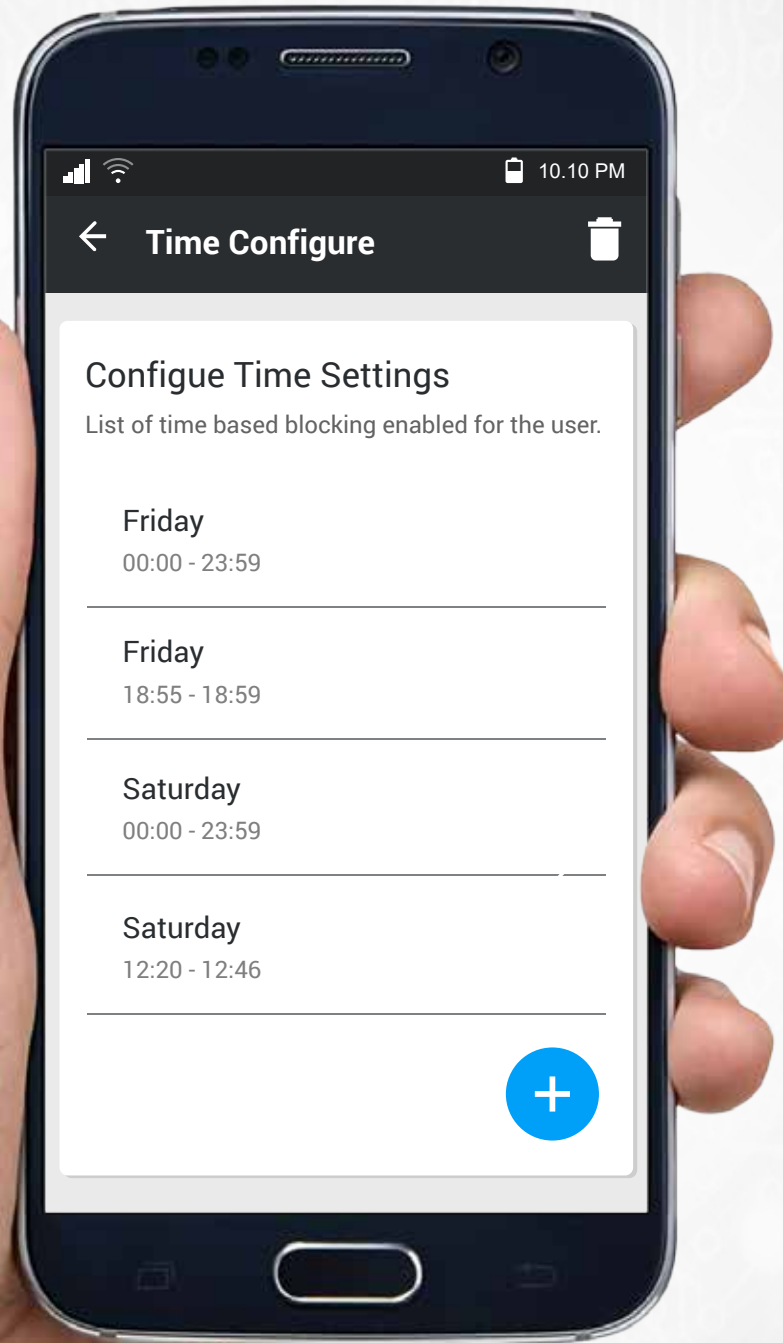

PARENTAL CONTROL

Blacklist websites browsed on PC by your kids and monitor their internet usage.

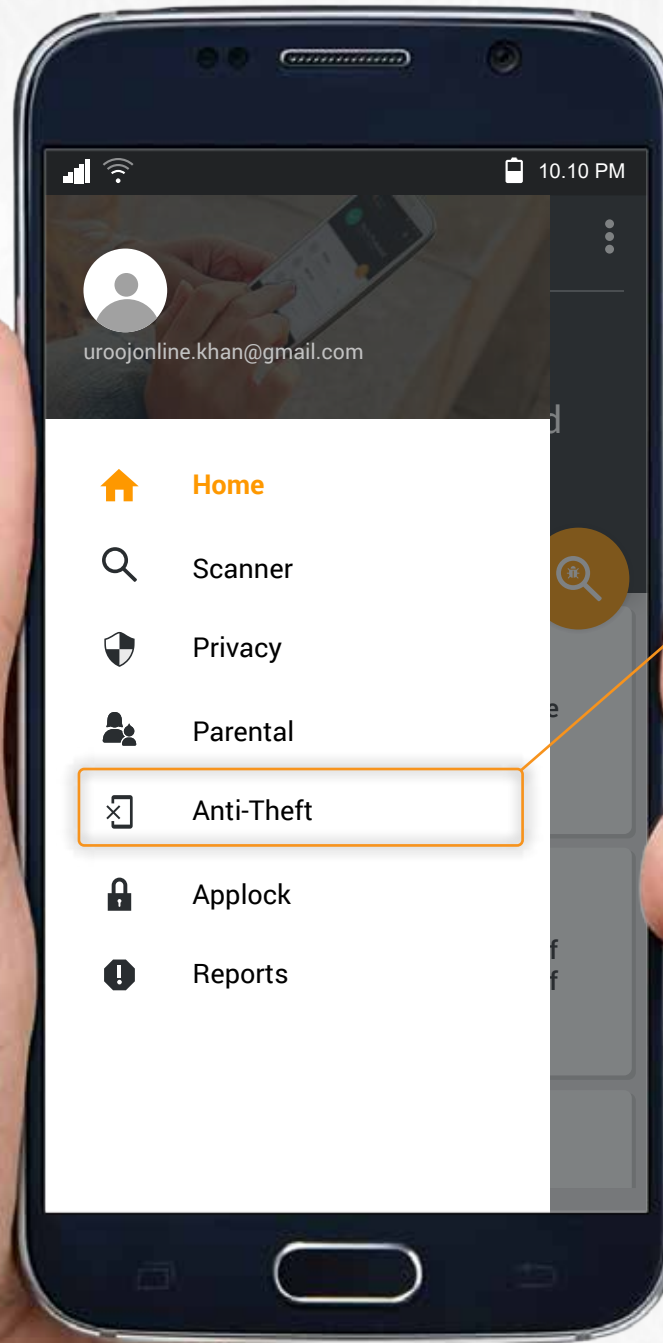

You can block websites based on categories like 'Adult', 'Gambling', 'Dating', etc.

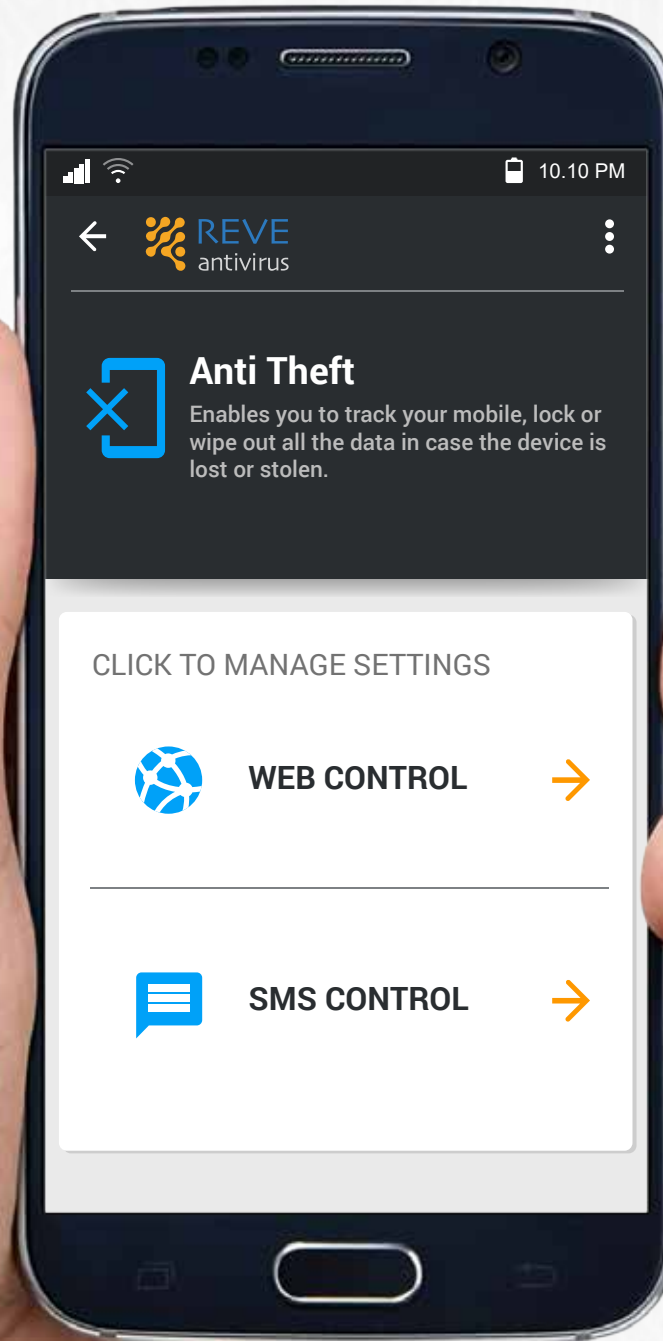

Time settings allow you to set particular days & hours for internet usage of your kids.

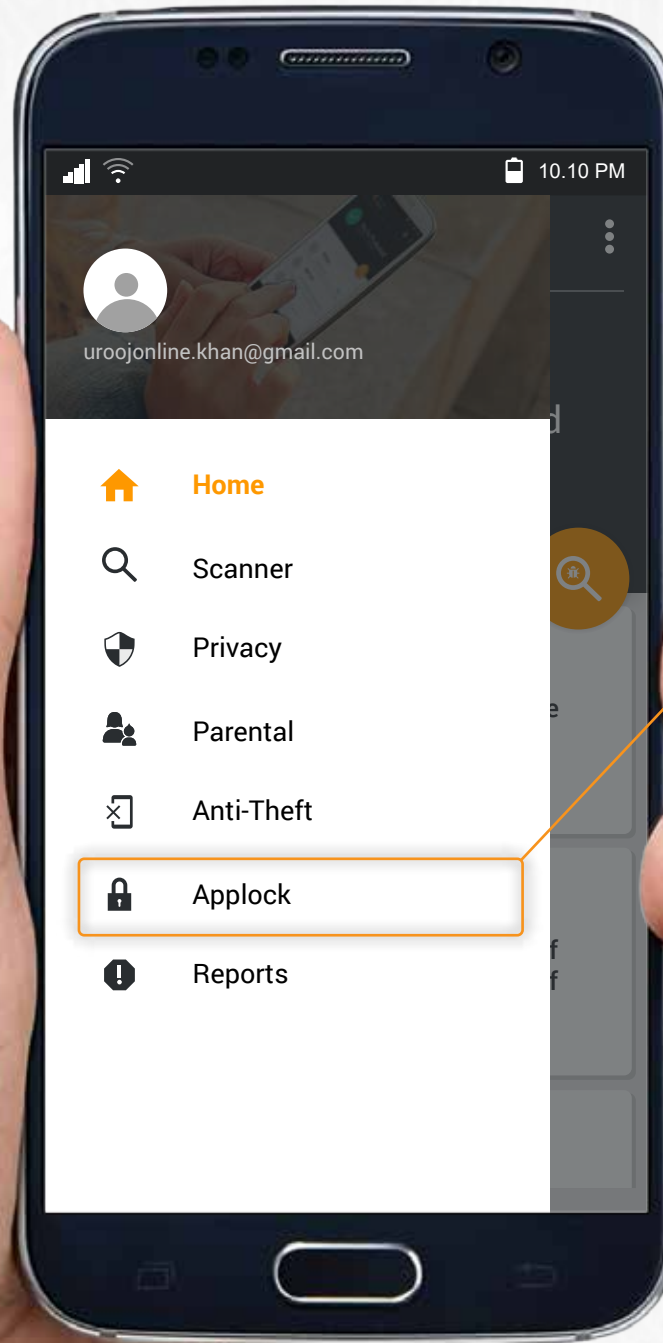

ANTI-THEFT

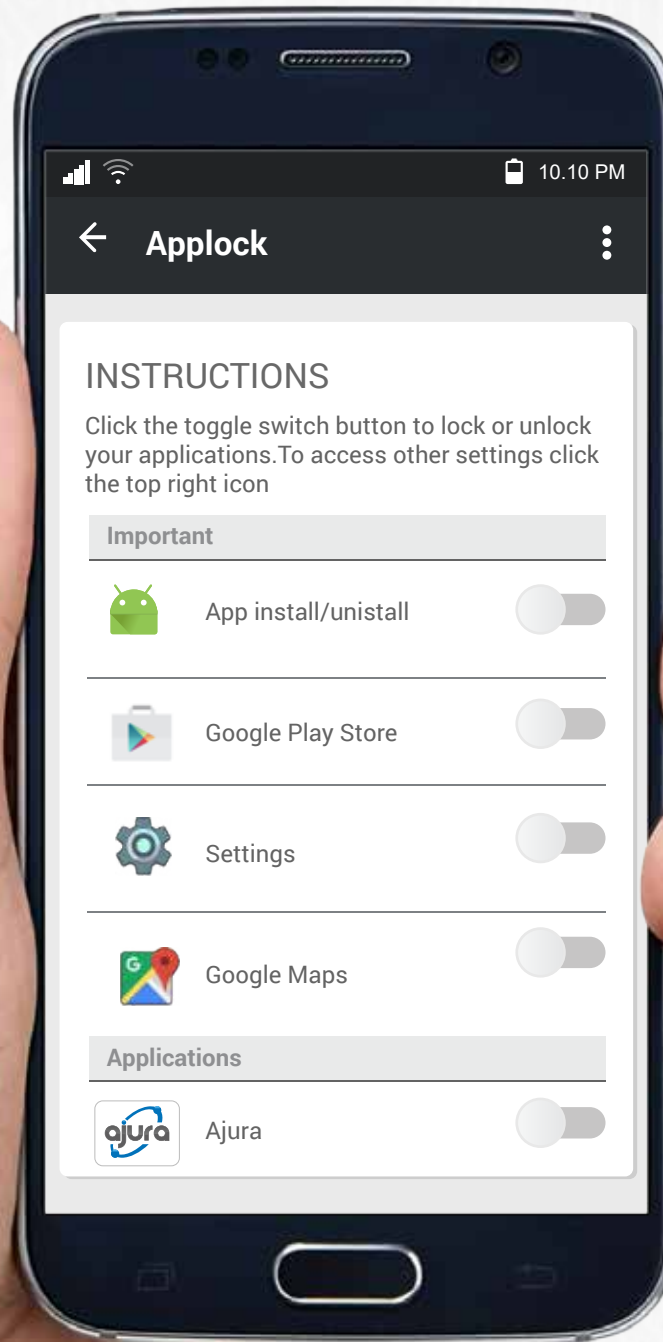

Anti-theft feature protects the data of your mobile when lost or stolen.

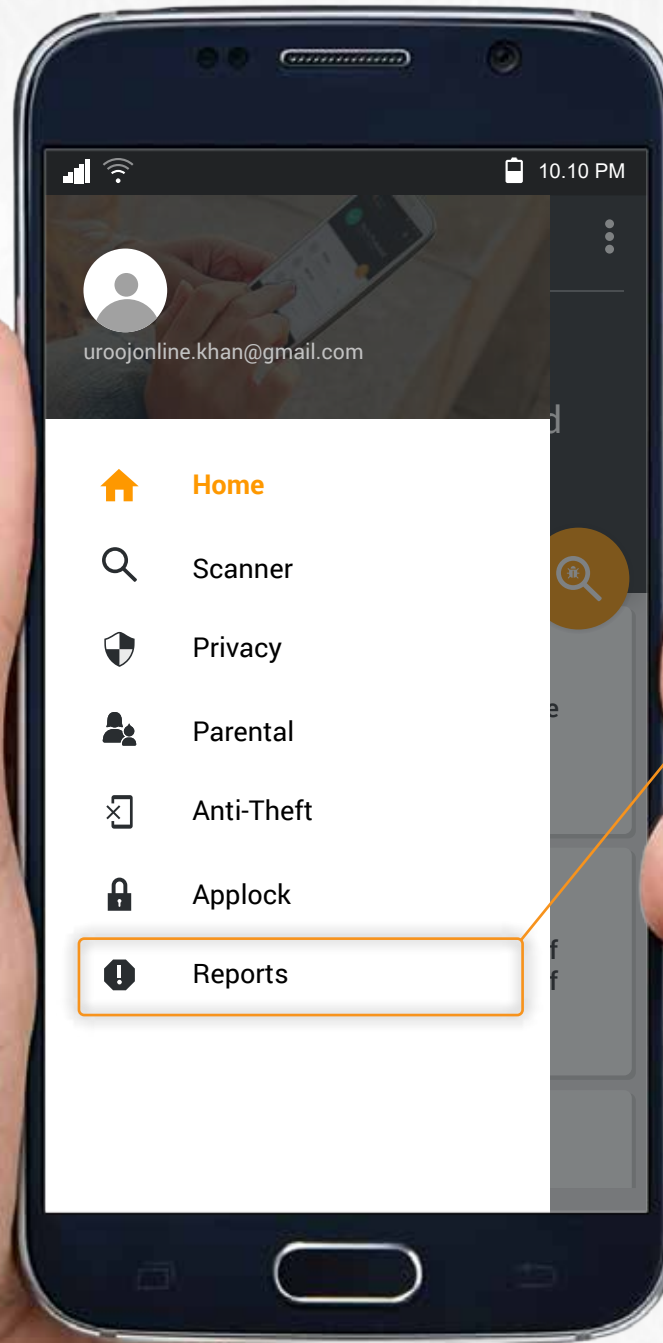

Lock the device and wipe data in case of theft sending a pre-defined SMS from a trusted number saved on the app.

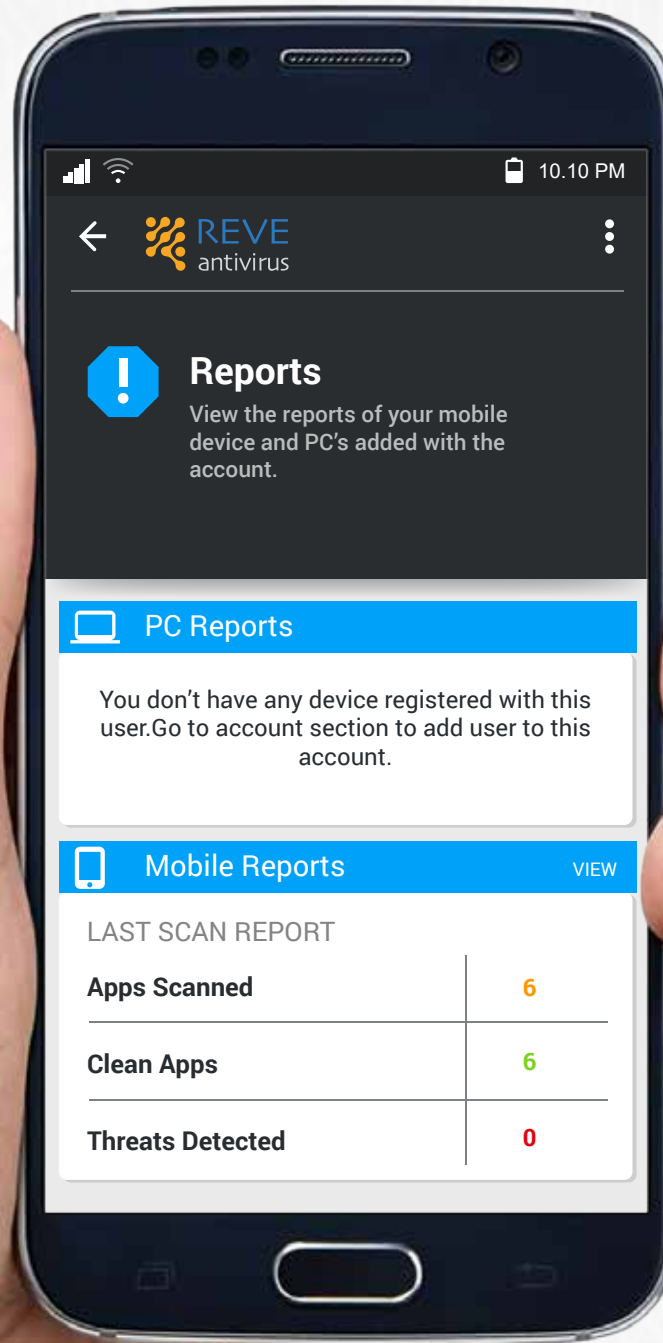

Protects your privacy by helping you lock installed apps using a password.

Clicks photo of anyone who tries to enter the wrong password 3 times.

Reporting feature gives you the complete status report of your PC.

Tap on
'Reports' to view
detail report
of scanned files,
infected &
quarantined.

Thank You!!
